High volume few skus.
DEXION

Double deep racking

*Big orders
dispatched fast.*

Double deep racking.

Your business:

You don't have too many different products, but you distribute them in high volumes. You might well manufacture them yourself. The same SKUs are stored in groups of pallets prior to dispatch.

Our solution:

Double deep racking stores products up to four pallets deep, allowing for rapid dispatch of large, single-SKU orders. The double-entry aisle allows unparalleled access via dual pantograph or sliding fork attachments.

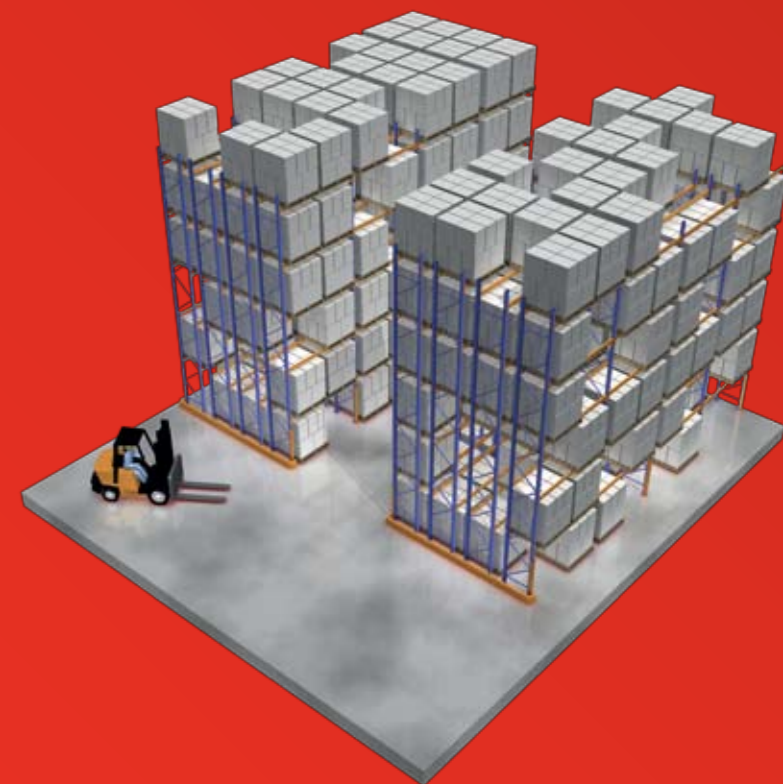

The vital statistics:

Average locations used _____ 88%

Immediate accessibility _____ 50%

Stock rotation _____ Average

Average floor area by pallet position (sqm) _____ 0.60

Access like
no other.

Take efficiency
to greater
heights.

Upper levels can
be fitted with guide
rails to assist
operators in
locating pallets.

The bottom beam is
clear of the ground
allowing the reach
trucks legs to pass
under it.

Height of the system and load weights are driven by forklifts and pallets.

Tested to the highest Australian and international standards.

Dexion provides you with more component choices.
