

Dexion Dynamic Locking Range - Bronze Level

Key Lock

Two Point Key Lock

Latch Lock

Pincer Lock

TZ SwingHandle™
TZ Ready

Product overview

The Dexion Dynamic Locking Range offers users three distinct levels of locking, each with varying connectivity, security and functionality options. Bronze level locking offers manually operated locks which are typically the default for securing Dexion's range of storage products.

Our key, push and latch locks are very popular and suit a variety of applications and budgets. Key and latch locks are a versatile solution found in the Dexion Strata 2 Tambour Door and Swing Door cabinets, Agile Lockers and Freetrack 2 / Mekdrive 2 / Multibay 2 Compactus products.

Dexion's unique 'Pincer' style Tambour Door Cabinet latch lock provides ultimate peace of mind with one key operating two lock latches with separate anchor points in the door. Push locks are used to secure the Dexion Strata 2 Sliding Door Cabinet and prevent lateral movement of the doors.

The optional SwingHandle™ from our partner TZ gives users the benefit of additional leverage to easily apply moderate force when operating the lock. Swing Handles can be fitted to Dexion's Freetrack 2, Mekdrive 2 and Multibay Compactus in place of traditional aisle locks or the main unit lock, either during installation or at a later stage. Importantly, this manually operated Bronze level TZ SwingHandle™, can easily be fitted with an electronic upgrade to a Gold level lock, providing additional functionality including; multi colour LED door status indication, alarm, user access audit trails and activity reporting, manual key override and third party product integration.

Product applications

Strata 2 Range	Key Lock Push Lock Pincer Lock
Agile Locker Range	Key Lock Latch Lock
Freetrack 2 - Manual Compactus	TZ SwingHandle™ - TZ Ready Key Lock
Freetrack 2 - MekDrive 2 Compactus	TZ SwingHandle™ - TZ Ready Key Lock
